STYLING EDITORS

CURATING SPACES. ART. OBJECTS. A WAY OF LIVING.

A PERSONAL APPROACH TO LIVING

A home is more than a collection of furniture and objects. It is a reflection of who we are, what inspires us and how we choose to live.

Styling Editors is a spatial curation studio founded by Peter Gallet and Raul Escobedo. We bring together art, furniture, lighting, textiles, ceramics, books, antiques and distinctive objects to create interiors with character, harmony and a personal identity.

We are not a traditional interior architecture firm. Our approach is about curation rather than redesigning everything from scratch.

We believe that a truly remarkable interior often begins with what is already there — discovering its potential, refining existing elements and introducing carefully selected pieces that bring a new dimension to the space.

WHAT WE DO

THE EDIT	Reimagining what you already own. We refine, rearrange and rediscover existing furniture, art and objects to create a fresh perspective on your home.
THE CURATION	Finding what belongs. We select distinctive furniture, lighting, art and objects that complement your space, reflect your personality and enhance the way you live.
SOURCING	Connecting you with exceptional pieces, from contemporary design and independent makers to vintage finds, antiques and art.

HOW WE WORK

01 - THE FIRST VISIT	We meet at your home to discuss your expectations, understand your lifestyle and experience the atmosphere of your space. We look at what you already own, identify opportunities and discuss your budget.
02 - THE STUDY	We develop an initial vision with recommendations tailored to your home, your taste and your budget.
03 - THE CURATION	We source and select the pieces that bring the vision together, combining existing possessions with carefully chosen additions to create a cohesive and personal result.

OUR PHILOSOPHY

We believe that good taste is not about how much you spend. It is about making thoughtful choices,

discovering unexpected combinations and finding the right things for the right place.

A home does not need to be completely new to become extraordinary. Sometimes, all it takes is a different perspective.
